## About me

As a cross-disciplinary engineer, I bring a unique perspective to problem-solving and innovation. With a background in Energy and Technology, I have the ability to design and implement software solutions targeted to the energy sector. Excellent analytical, problem-solving, and communication skills I am seeking to leverage expertise to drive innovation and contribute to cutting-edge products.

## Working Experience

### ● Software Engineer

June 2021-October 2023

RenoptiPower, Athens, Greece

Development of an Algorithmic Power Trading Platform for the Wholesale Energy Market under Microsoft ecosystem.

My main achievements were the implementation of a completely independent infrastructure for the aggregation of RES to the wholesale market.

## Education

### ● MSc, Business Mathematics

October 2021 - May 2024

Athens University Economics and Business

Quantitative methodologies such as Investment Analysis, Risk Management, Mathematical Operations and much more techniques of the modern business field are included in this program.

### ● MEng ,Diploma of Electrical and Computer Engineering

September 2014 - August 2020

University of Patras

Undergraduate Studies: Department of Electrical and Computer Engineering - University of Patras.

Field of specialization: Division of Electric Power Systems

Thesis: Development of an electricity market simulation platform with elastic producers and loads .
